

Justin Winslow

justinwinslow55@gmail.com | (757) 474-5034 | Virginia Beach, VA | www.linkedin.com/in/justin-a-winslow/ | justinawinslow.github.io

Results-driven Software Engineering Leader with over eight years of experience delivering scalable, high-quality full-stack solutions and effectively leading agile engineering teams. Proven success mentoring and developing engineers, driving strategic architectural decisions, and implementing process improvements that enhance performance and productivity. Passionate about fostering collaborative team cultures, aligning technical execution with business goals, and committed to continuous personal and organizational growth in engineering management.

PROFESSIONAL EXPERIENCE

Team Lead

Agile Defense (*Remote - VA*) | Feb 2024 - Current

- Led a high-performing team of 5 engineers, overseeing architecture, mentoring, and code reviews, resulting in a 30% improvement in system performance.
- Led a complete UI rewrite using React, Redux, and RTK Query, significantly enhancing user experience, maintainability, and scalability.
- Analyzed and optimized a critical application component using React and Spring Boot, achieving a ~90% improvement in load performance through targeted refactoring and architectural enhancements.
- Delivered a scalable microservice using Spring Boot and PostgreSQL, enhancing backend maintainability.
- Improved Agile processes by refining sprint planning and retrospectives, increasing team velocity by 20% and significantly enhancing sprint predictability.

Software Engineer

BetterCloud (*Remote - VA*) | June 2022 - Feb 2024

- Spearheaded a team of 5 engineers to create automated retry logic using Java and Spring Boot, reducing on-call alerts by 52% and increasing focus time for development by 25%.
- Designed and executed a Kong API gateway solution to oversee and optimize outbound API calls, improving the observability and coordination of communications across 70+ different provider APIs.
- Reduced unused Kafka topic messages by 68 million per month, significantly cutting overhead.
- Developed a command-line interface (CLI) using JavaScript that is integral to our CI/CD process, streamlining the automatic building, testing, and deployment of new OAS spec files to the API gateway.

Software Engineer

HII Technical Solutions (*Norfolk, VA*) | July 2021 - June 2022

- Developed backend APIs using Spring Boot and frontend UI with Sencha JavaScript.
- Contributed to the refactoring of the Java codebase, reducing the overall loading time by 60%.
- Conducted code reviews and implemented new coding standards that reduced time spent on reviews.

Front-End Developer

Antech Systems Inc. (*Chesapeake, VA*) | Jan 2020 - July 2021

- Pioneered testing protocols by implementing 500+ unit tests leveraging Jasmine testing framework, achieving a 95% increase in test coverage, significantly reducing bugs in production.
- Built dynamic web pages using JavaScript, HTML, and CSS in collaboration with backend teams.

Software Engineer

Newport News Shipbuilding (*Newport News, VA*) | May 2017 - Jan 2020

- Developed and maintained site-wide models and simulations using an in-house developed entity framework for the backend and Swing for the Graphical User Interface.
- Collaborated with stakeholders, ensuring software solutions aligned with customer requirements.

SKILLS

Java, Spring Boot, SQL, JavaScript, HTML/CSS, Sencha ExtJs, YAML, AngularJs, React, JUnit, Jasmine, Jest, Node.js, MySQL, PostgreSQL, Redis, Git, Linux, Gitlab, Jenkins, Jira, Gradle, Docker, Kubernetes, GCP, Kafka, RESTful, JSON

EDUCATION

Bachelor of Science in Computer Engineering

Old Dominion University
